Taipei, Taiwan • a94763075@gmail.com • 0917 515 581 • github.com/a94763075

Summary

AI Engineer (4+ yrs) building production **AI agents** and **multi-modal systems**.

Specialized in **Agentic RAG + tool calling (MCP)**, retrieval at scale, and CV/ASR integrations.

Shipped high-concurrency services over 10M+ corpora on **GCP (Docker/Kubernetes)**, optimizing latency/cost.

Partner with PMs to turn engineering trade-offs into business decisions; drive initiatives beyond ticket execution.

Experience

AI Engineer (GenAI & Cloud Architecture)

Taipei, Taiwan

Boldtek - Enterprise AI Solutions

Sept 2025 – present

- Architected **Agentic RAG** with **MCP + Google A2A** for enterprise workflows; enabled multi-step tool calling.
- Achieved **94% ExactMatch** via multi-tenant RAG isolation + KG-powered hybrid retrieval (**Vertex AI**).
- **Reduced inference latency 40%** via prompt caching for high-concurrency serving.
- Orchestrated Multi-Agent MCPs on **GKE** with **LLMOps pipelines** for automated eval and scaling.
- Mentored team through Code Reviews, established Documentation System to standardize engineering workflows.

Data Engineer

Taipei, Taiwan

Yourator - HR Tech Platform

Jan 2023 – Sept 2025

- Owned **end-to-end AI** across Teamdoor & Yourator product lines (pipelines, serving, evaluation).
- **Cut serving costs 95%** by shipping an enterprise NER resume parser on **Vertex AI** with full MLOps
- **Improved job-matching accuracy 20%** with a hybrid recommender (**Elasticsearch** + vector embeddings)
- Built **audio analysis** pipelines with **ASR + Gemini API** to turn interview data into BI signals.
- Built BI dashboards for **production AI monitoring** to support triage, roadmap priority with stakeholders.

Data Scientist

Taipei, Taiwan

Global Chinese Group (1111 Job Bank)

Sept 2022 – Jan 2023

- Reduced memory **8GB → 400MB** and **P95 <200ms** by refactoring recommendation serving on production.
- Served **20k+ daily queries** with **89% accuracy** finetuning **BERT-based NER** for query understanding.

Data Engineer

New York, US (Remote)

Renthop (US Real Estate Platform)

May 2021 – June 2022

- Integrated **ResNet** image classification into data pipelines to enable property content understanding features.
- Built a **human-in-the-loop** labeling + review loop to improve precision/recall on edge cases.
- Designed and maintained **20+ Airflow ETL workflows** for reliable ingestion from external sources.

Skills

AI Agents & LLMs: Agentic RAG, MCP, Tool Calling, LangChain, Semantic Kernel, Prompt Engineering

Multi-modal & Vision: ResNet/ViT, Image Classification, Multi-modal RAG, ASR Integration

LLMOps & Cloud: GCP (Vertex AI, BigQuery, Cloud Run), Docker, Kubernetes, CI/CD, MLflow, Eval

Data & Search: Faiss, Elasticsearch, Neo4j, Python, SQL, NoSQL

Software Engineering: SOLID, Testing, CI/CD, GitHub, Agile, Git, REST API, gRPC

Education

National Taiwan University of Science and Technology

2017 – 2020

in M.S. in Computer Science (GPA 4.08/4.3)

- **Research:** Neural Retrieval & Language Modeling (foundations of modern RAG).
- **IEEE ICASSP 2020:** A Neural Document Language Modeling Framework (Awarded IEEE Grant)
- **IEEE ICASSP 2019:** Generating Pseudo-relevant Representations for Spoken Document Retrieval

Projects

Taiwan Legal MCP Server (Agent System)

2025

AI-Powered Legal Knowledge System

- Built a **Multi-Agent System** implementing the **Model Context Protocol (MCP)** to standardize tool
- Orchestrated **LangGraph** with **Elasticsearch RAG** to solve complex legal across 12+ law collections.
